

**AMENDMENTS TO THE SPECIFICATION:**

Please amend the paragraph beginning at page 19, line 7 of the original specification (paragraph 0064 of the *published* application) as follows:

When the call connection is performed between the hybrid access terminal 110 and the 1X system, the mobile switching center 140 stores information of the hybrid access terminal 110, which is located in a region of the mobile switching center 140, in the ~~VLR 134~~ VLR 144, and processes call signals of the hybrid access terminal 110 according to profile information of the hybrid access terminal 110 stored in the ~~VLR 134~~ VLR 144.
